

PUBLIC SERVICE ANNOUNCEMENT

Date: January 5, 2026
To: Media Outlets
From: Shane Bowles, Public Works Director
Re: Water Service Interruption

Due to a 12-inch water leak at West 13th Street and Mesa, residents on the west side of Big Spring will have low to no water pressure while repairs are made. Crews will work diligently to restore service as quickly as possible, but residents in the affected areas should plan for possible delays. Once service is restored, customers may experience temporary discoloration or low water pressure. This is normal and should clear after running the tap for a short period.

We apologize for any inconvenience and appreciate your patience. For questions or additional information, please contact the Public Works Department at 432-264-2501.
