

PUBLIC SERVICE ANNOUNCEMENT

Date: March 30, 2026
To: Media Outlets
From: Jay Holt, Big Spring Fire Chief
Re: Emergency Alert System Test – April 2

The ability to efficiently and effectively warn our community during emergencies is critical to public safety. To ensure these systems are functioning properly, City of Big Spring Emergency Management officials will conduct maintenance and testing on the emergency warning siren system on Thursday, April 2, 2026. There will be short intervals of siren testing between 10:00 a.m. and 12:30 p.m. This is only a test, and no action will be required from the public.

We will complete siren testing at 2:30 p.m. Any siren heard after 2:30 pm on Thursday, April 2, 2026, will not be a test.

We appreciate your cooperation as we work to ensure our emergency communication systems remain reliable and ready when they are needed most.
